

Gary Miller, EPA Region 6  
EPA Regional Officer

RECEIVED

16 JUN -1 PM 2:11

Dear Mr. Miller,

The San Jacinto River Waste Pits should be permanently capped as soon as possible. The EPA cannot permit the parties responsible for this mess to use invasive remediation techniques like dredging to clean up the contamination. Dredging will almost certainly do more harm than good. I implore you to hold the corporations accountable and compel them to cap the waste pits.
